- **Resilience:** to **spring back** and use obstacles as a springboard to jump higher and not remain in a state of acceptance.
- **Passion and willpower:** the keys to success. As Voltaire said “**passion** for a human being is like the wind in the sails of a boat. Sometimes it makes the vessel capsize but it is the only thing that pushes it forward.” According to Théodore Monod “To live is to continually move forward,” and “he who **desires** is strong.”
- **The role of the team:** the strength of **group effort** and the **respect for others**. The importance of the team's quest for the same goal (knowledge and respect for everyone's job).
- **Management:** The **example** set by the manager to lead his team to a higher level. The spirit of a team comes from the manager. Stress and crisis management.
